Serving Those at Risk for HIV/AIDS

IF YOU THOUGHT HIV/AIDS was a health epidemic from the past, Sharon Parker has news for you. The threat is spreading through at-risk populations, and her research aims to identify these groups and make them aware of pre-exposure prophylaxis (PrEP), which is a course of HIV drugs taken by HIV-negative people to prevent infection. Truvada® is a daily pill HIV drugs taken by HIV-negative people to prophylaxis (PrEP), which is a course of research aims to identify these groups through at-risk populations, and her has news for you. The disease is spreading epidemic from the past, Sharon Parker thought
