- Jeffrey Shears – Social Work
Hooper, the State of Things
Just one note about the budget

Thank you to all who are working an overload!

Do something bigger altogether
State of the School

Enrollment

- Fall Enrollment – 537 Freshmen!
- Undergraduates – 2703
- Graduates – 358
- Total Enrollment – 3061 (just five less than last year!)
State of the School

Research

- Number of submitted proposals this past year = 58
- Dollar amount in submissions = $32,945,685
- Number of ongoing awards = 28
- Number of faculty involved = 58
- Dollar amount in ongoing awards = $7,146,577
- Number of interdisciplinary awards = 7.13
- Dollar amount in interdisciplinary = $1,694,038
Our Support for Graduate Study

- HHS committed over $500,000 in GA funding to supplement funding from Graduate School!
- Committed $70,000 in Summer assistantships
- 36 graduate students received travel support to present posters or papers at professional conferences
- 29 graduate students presented their research at the Graduate Research and Creativity Expo. Students from CSD, KIN and NTR received awards for their work
State of the School

Interdisciplinary Courses covered these important topics for our grad students:

- Professional development
- Advanced statistics
- Grant-writing for community organizations
- Professional ethics
- Strategies for improving writing and publishing research
State of the School

Our Support for Undergraduate and Graduate Study

• This year we will award nearly $300,000 in scholarships that will help students continue their studies in HHS

• $10,000 is available for student research awards – please encourage your grads and UGs to visit http://www.uncg.edu/hhs/scholarship/research-awards.html and apply
  • If you have a project or have students working on projects – this might be a way to leverage some additional funding – deadline for proposals is 9/27
Perrin Wine in the Headlines Again

“Brad Pitt and Angelina Jolie launch wine with Perrin family” (from Decanter.com February 2013)

Priceless!
Faculty who Play Well with Others

Etnier and Calkins - Acute Exercise and Cognition Effects (ACE)

Lovelady and Gold – Ten Years of Teaching and Research

Dudley and Fine – Lessons Learned from Co-teaching an Interdisciplinary Graduate Statistics Course

Haldeman, Morrison and Shreeniwas – Faculty Sandbox: Playing Well Together has Benefits

Cleveland, Francisco and Wineburg – Grant Writing for Community Organizations
Physical activity and cognitive performance relative to ADHD symptoms

Graduate students and faculty from KIN (Exercise Psychology) and HDFS

Acute exercise and Cognition Effects (ACE)
- Previous research shows acute exercise benefits cognitive performance by children with ADHD
- No study has compared effects between children with and without ADHD

Procedures
- Children 8-14 years of age
- Measure ADHD symptoms
- Exercise for 20-min on one day
- Watch Planet Earth DVD for 20-min on other day
- Perform TMT, TOL, and Stroop after treatment
- Record spectral EEG

Outcomes
- Graduate student learning
- Data to support scholarly outcomes
- Scholarly outcomes and data to support proposal for external funding
Collaboration: Ten Years of Teaching and Research

- NTR/KIN 576—Nutrition and Physical Fitness
  - 80 Senior and graduate students in Nutrition and Kinesiology
  - Teach from our strengths
  - Each responsible for writing and grading our parts of the exams/case studies
  - Integrative diet and exercise project

- Mentoring 7 graduate students
  - Nutrition student received the American College of Sports Medicine’s BONE Interest Group Student Research Award

- Research projects
  - BEHIP—Breastfeeding and Exercise for Healthy Infants and Postpartum Mothers
  - GEM - Get active, Eat right, Moms at work

- Four Manuscripts in Exercise and Nutrition Journals

- Grants
  - Pending: Pathways from Childhood Self-Regulation to Cardiovascular Risk in Adolescence (collaboration with Susan Calkins)
Lessons Learned from Co-teaching an Interdisciplinary Graduate Statistics Course
FACULTY SANDBOX: Playing Well Together Has Benefits

2002
Immigrant Research Support Group
Obesity Rural-Urban Mothers & Children
